

# High Speed Internet Access

## Reliable Visitor-Based Network Solutions

Specializing in visitor-based networks, ITG offers reliable high-speed internet access solutions for a variety of hospitality venues, from hotels and motels, to hospitals, office complexes, and public areas. ITG offers networking solutions that take advantage of traditional data cable or wireless technology. ITG helps to lower the cost of ownership, improves return on investment, and provides for greater user satisfaction.

### Professional Installation

Specializing in visitor based networks, ITG enables hotels, public venues, and apartment communities to provide reliable high-speed Internet access. ITG offers a turn-key solution by combining 24/7 end-user support with scalable networking solutions that take advantage of traditional data cable, existing telephone wire, or wireless technology. Property owners find that ITG solutions help them lower their total cost of ownership, improves return on investment, and provides for greater user satisfaction.

### Reliable Support

ITG provides reliable 24/7 network monitoring and end-user technical support. Regardless of how a guest is accessing the network, over a wired connection in a guest room or a wireless access point, surfing the internet or remotely accessing a corporate VPN, ITG's knowledgeable staff can assist them.

Please call us at 1-877-934-4636 for more information on ITG Networks products and services.
