

Phone System Solutions

Full Featured Systems for the Hospitality Industry

With a proven track record of providing reliable technology solutions to the hospitality industry, ITG is now offering quality phone system solutions for a variety of venues, from hotels and motels, to hospitals and office complexes. Property managers find that ITG's turn-key solutions help them lower their total cost of ownership, improve return on investment, and provide greater guest satisfaction.

Professional Installation

ITG consults with property owners to design a customized communications solution that meets franchise and ownership requirements. If you choose ITG to pre-wire your new construction, our installers will terminate, label and test every line. The certification results are recorded on CD and available upon request. A certified network helps to assure that you will not experience problems down the road.

Reliable End-User Support

Properties are constantly challenged with having to provide a variety of communications services for their guests. Installing a reliable network is only the beginning. It is very important that the network is managed to meet end-user expectations. ITG provides reliable network monitoring and technical support. We offer affordable support service contracts that protect your existing and future investment.

Please call us at 1-877-934-4636 for more information on ITG Networks products and services.
